

IEEE IES STUDENTS & YOUNG PROFESSIONALS PAPER ASSISTANCE PROGRAM (IES-SYPA) and SYP FORUM

The Student & Young Professionals (S&YP) Activity Committee of the Industrial Electronics Society (IES) is continuously implementing a paper assistance program (IES-SYPA) – a competition-based financial support for the IES S&YP members to attend IES Majority Sponsored Conferences. For the **SII 2026**, we allocated **10 SYPA's up to 1500 USD each**, which can be used to cover the transportation costs to the venue city and back using the most economical means of transportation, participation fee, and accommodation in a hotel not higher than 3-star class.

Moreover, during the conference, we will organize a SYP forum – a special event aimed at helping students and young professional members stay connected in the IES community. SYP forum will provide a unique opportunity to ask questions and get professional advice directly from IEEE Fellows, the IES President, AdCom members, and experienced colleagues. The SYP forum program will include a series of keynote speeches by the leaders of academia and/or industry, a 3-minute Video Session, and an open discussion between the participants. We encourage all conference participants to join!

● How to Apply for IES-SYPA

- ❖ You **MUST** be an IEEE member. Whether Student, Graduate Student or Young Professional (YP). You are considered YP up to 15 years after your graduation.
- ❖ You **MUST** be a member of the IEEE Industrial Electronics Society.
- ❖ You **MUST** have a paper accepted at the conference as an author or co-author and be the person to present it at the conference.
- ❖ You **MUST** reside outside the city in which the conference is held.
- ❖ Your paper should be fully registered.
- ❖ You **SHOULD NOT** have received the SYPA in the last 2 years.
- ❖ In the submission system, if you toggled the correct membership (Student or YP), the “IEEE-IES SYPA” tab will appear once the paper is accepted. Click on that and submit the required information/document/video.
- ❖ You **MUST** prepare a video and send it according to the following rules:
 - The length **MUST** be **3 minutes**. Even 1 second more or less is not tolerated.
 - **Avoid using PowerPoint slides for most of the video**. Be creative and generate interactive content! Watch more videos to get ideas.
 - Some seconds **MUST** be devoted to the paper information, such as title, authors, affiliations, your university, company, research team, etc.
 - At least the last 5 seconds **MUST** contain the **Acknowledgment to IEEE IES for the IES-SYPA!**
 - The video **MUST** be shared through sharing websites like Dropbox, Google Drive, OneDrive, etc. Make sure to provide the link without requiring permission (**MUST** be viewable to anyone who has the link)

- **Application Form:** <https://forms.gle/VCZhvKnCHw3bNLUAA>

For any questions regarding the SYPA application **submission** issues, please contact the conference support team directly at: conferences@ieee-ies.org.

- **Review Process**

The committee members will review videos in 2 rounds. All applicants will be given one chance to update their videos according to the 1st-round comments. Then, the final video will be reviewed in 2nd-round and receive an average score based on its **impact, creativity, style, presentation, video quality, etc.** The ones with the highest scores from both paper and video reviewers will be selected as the winners of the IES-SYPA. They will receive financial support for travel expenses and a diploma during the Gala dinner.

The winners' videos will be uploaded to the [IES YouTube Channel](#), and you will receive an email including the link to your video on the IES YouTube Channel. You should copy that link to the IES Facebook Event page of the conference and wait for the thumbnail to appear, then post it!

Moreover, you should post the link to your video to the IEEE Collabratec. You are also allowed to share it on any other websites. The direct link to the Facebook event page and IEEE Collabratec Group will be sent in the same email and will be available on the conference website.

- **Timeline**

✓ IES-SYPA Application submission deadline:	12 Nov 2025
✓ 1 st -round general comments on the videos will be sent by:	23 Nov 2025
✓ Submission of the final 3-minute video:	29 Nov 2025
✓ Announcement of winners:	5 Dec 2025

- **To Receive the Travel Assistance**

- 1- You **MUST** be on the list of final SYPA recipients.
- 2- You **MUST** attend the conference and give a 3-minute speech during the 3-minute Video Session.
- 3- You **MUST** submit the surveys prior-during-after the conference, which will be provided by the SYPA organizing committee.

DO NOT FORGET to bring your video file to the 3-minute Video Session. The videos will be displayed on a large screen, and you will talk to the audience for 3 minutes. So, your speech should be very brief and informative. All information (including the place, date, and time) for the 3-minute Video Session and the ceremony to receive the Diplomas will be announced by the first day of the conference.

The fund can cover your expenses, including conference registration, transportation, and accommodation. So, keep your receipts and use the **Concur** platform to submit the expenses and other required information. All instructions can be found on the SYPA page of the conference.

It should be noted that if many applicants have obtained a high score, the committee can reduce the travel assistance amount to 1000 USD per applicant. This exceptional measure is to support the travel of a higher number of excellent applicants.

● Some Tips to Prepare Your Video

1. The 3-minute Video Session aims to help researchers/engineers (students and young professionals) learn how to advertise their projects to the public and promote themselves. Whether your work is theoretical or by simulations, you are expected to prepare the movie as interactive, live, and interesting for the viewers. Record some minutes from running results in the software during simulation or practical tests.
2. Record some videos from your hardware design or even software results (e.g., the screen of your computer) while they are running. Or add some discussion with co-authors, research team, etc. At least 70% of your video should include interactive parts rather than solid slides.
3. It is recommended that you present the work with your own voice during the video recording. Please present it in a different way than a PowerPoint presentation. Your video will be placed on the IES YouTube Channel and should attract viewers.
4. Showing some information on the video using simple texts as subtitles is also recommended. Note that the voice is helpful for YouTube viewers; however, during the conference, it will be replaced by your 3-minute speech. The video may be displayed without sound during the S&YP 3-minute Video Session.
5. Sometimes, background music can make your video much more enjoyable.
6. The audience has already seen your paper presentations, so be different in your videos.
7. Try to make people interested in your videos. Devote some seconds of the video to your office, lab, or any place you work in and show the stuff you use for that project, introduce co-authors and supervisors, explain motivation, etc.
8. The 3-minute video does not need to show the details of your work. Some concepts are enough to attract people's attention. Deep theoretic and mathematics are useless for advertising your project to people with different interests.
9. Note that the video should be impressive and interactive. Static pictures interest only some. Find gifs or flash images from the Internet.
10. Ensure you have the copyright for materials used in your video, including animations, songs, photos, etc.
