OS Title k3791

Enhancing Active Learning through Computer Supported Collaborative Learning (CSCL)

Abstract

Active learning has received considerable attention over the past several years. Technology integration has also great impact in active learning. Therefore, recently, many researchers develop the Computer Supported Collaborative Learning (CSCL) systems and investigate peer interactions in terms of intervention styles and intervention strategies used by students in CSCL.

This session is organized to discuss enhancing active learning through CSCL at all levels. Papers in this session are solicited for, but not limited to, professional development and integration of CSCL system, development of curriculum for active learning, case study, practical education and educational evaluation using CSCL system.
